Research area Hyperbolic geometry and low-dimensional topology. My current research concerns the multiplicity of simple closed geodesics on hyperbolic surfaces.

Education

PhD in Mathematics, University of Luxembourg, Luxembourg — 2018 - 2022
Advisor: Prof. Hugo Parlier
Thesis: Quantifying some properties of curves and arcs on hyperbolic surfaces

MSc in Mathematics, University of Nice Sophia Antipolis, France — 2016 - 2017
Advisor: Prof. François Labourie
Thesis: Arithmetic and ergodic theory of hyperbolic surfaces

BA in Mathematics, University of Education, Ho Chi Minh City, Vietnam — 2013 - 2015

Academic positions

[3] **Researcher**, Institute of Mathematics, VAST, Vietnam — 2022 - present

[2] **SASEA Research Fellow**, National University of Singapore, Singapore — 2024 - 2026
Advisor: Prof. Ser Peow Tan

[1] **Doctoral Researcher**, University of Luxembourg, Luxembourg — 2018 - 2022

Papers

[11] Density of length ratios on Teichmüller space — 2026
(with Hanh Vo)
arXiv:2610.24700.

[10] Stable-norm boundary geometry on once-punctured tori — 2026
(with Xiaobin Li and Van Nguyen)
arXiv:2605.14574. Submitted.

[9] Graded Bridgeman dilogarithm identities on hyperbolic surfaces — 2026
(with Ara Basmajian, Hugo Parlier and Ser Peow Tan)
arXiv:2601.03876. Submitted.

[8] Optimal Farey sequence for the congruence subgroup $\Gamma_0(2^n)$ — 2026
(with Sang-hyun Kim, Mong Lung Lang and Ser Peow Tan)
arXiv:2601.01324. Submitted.

[7] Some arithmetic aspects of ortho-integral surfaces — 2026
(with Khanh Le)
Trans. AMS, 379 (2026), 6365 - 6392. arXiv:2504.09403

[6] Some remarks on subgroups of free-by-cyclic groups — 2026
(with Hoang Thanh Nguyen)
Vietnam J. Math., 54, 715 - 728 (2026).

[5] Self-intersections of arcs on a pair of pants — 2025
(with Hanh Vo)
Bull. LMS, 57 (2025), 2190 - 2209. arXiv:2407.17750

[4] Optimal special polygons for the congruence subgroups $\Gamma_0(p)$ and $\Gamma_0(pq)$ — 2025
(with Sang-hyun Kim, Mong Lung Lang and Ser Peow Tan)
J. Geom. Anal., Volume 35, 216 (2025). arXiv:2209.13937
